Division 8 News

Design plans for the Bumstead Road and Julie Street intersection upgrade.

Upgrade on Bumstead Road

Construction has started on the intersection upgrade of Bumstead Road and Julie Street which is on the border of Crestmead and Park Ridge.

This upgrade includes the installation of new traffic lights, a signalised pedestrian crossing, a dedicated right-turn lane, raised pedestrian crossing, on-road bike lanes and a new footpath along a section of Bumstead Road.

Roads will be resurfaced along with updated line markings and new concrete medians.

The upgrade will make the intersection safer for motorists, pedestrians and cyclists.

It will also improve traffic flow, reduce congestion and provide more reliable travel times for our growing area.

The intersection is a high-traffic thoroughfare that provides access

to residential streets, arterial roads, local shops and parks.

Upgrade works will be done Monday to Friday from 7 am to 5 pm and are scheduled to take about 4 months (weather permitting).

In preparation for construction, LED signs have been installed at the entry and exit of the work site to remind commuters of construction times so they can allow extra time for any traffic delays.

This intersection is being delivered with the support of the Australian Government's Black Spot Program.

To find out more on this project, scan the QR code below to visit the project webpage that includes the latest updates from Council's roads engineering team.

Your Community meeting invite

You're invited to attend our next Community meetings.

It's a great chance to share your thoughts, ask questions and have your voice heard.

The meetings are at **Logan Metro Sports and Events Centre** (357 Browns Plains Road, Crestmead) **from 6 pm to 7 pm** on the following dates:

 **Wednesday 17 June**

 **Wednesday 11 November**

It would be great to see you there!

Local contacts:

Logan City Council and Logan Water (24 hrs): **3412 3412**

Animal Ambulance: **1300 264 625**

What's on? **ourlogan.com.au**

Regular resurfacing is important to help make our busy roads safer.

Resurfacing is a boost for our busy roads

More than 4 kilometres of resurfacing will be carried out over the coming months to upgrade Bumstead Road and Green Road.

Works on Bumstead Road will be undertaken between Chambers Flat Road and Clarke Road,.

Green Road resurfacing will take place between Emerald Road and Clarke Road.

Bumstead and Green roads are 2 key thoroughfares that local residents use daily to travel between home, work,

schools and local shops.

Regular resurfacing is important to enhance safety on these roads and to enable them to accommodate an increase in traffic volume.

The resurfacing involves more than just replacing the top layer of the road surface.

The works also repair any potholes and uneven areas that creates a smoother and safer driving surface which helps the road last longer.

A new layer helps protect the

underlying pavement from water damage and cracking from increased traffic flows.

I was able to secure funding through the Logan City Council budget to have them resurfaced.

To reduce traffic and congestion for peak-hour commuters, the works will be done through to June, depending on the weather conditions.

It's great to see Council delivering for our area and I'm working hard to have more delivered.

The new footpath along Logan Reserve Road helps make for safer access to the nearby school.

New footpath delivered in Logan Reserve

Two new footpaths have been delivered along Logan Reserve Road and Green Road.

The new footpath along Logan Reserve Road is between Verge Street and School Road in Logan Reserve.

It features multiple entry and exit points that provide access for residents to nearby housing estates, the schools and local parks.

The Green Road footpath in Crestmead connects the already existing path to Rai Drive and provides access to nearby public transport and neighbouring residential estates.

These infrastructure upgrades are necessary for safety.

Intersection upgrade on Logan Reserve Road

The intersection of Logan Reserve Road and School Road is a vital connection for the community with residents using it to access the local school which is on the corner, nearby estates and shops.

This is an important infrastructure upgrade that is essential to improve the safety and accessibility for motorists and pedestrians who travel through the intersection.

The upgrade will include 4-way traffic lights, a signalised pedestrian crossing to replace school crossings, new line markings, an extension of turning lanes on Logan Reserve Road, a new footpath, additional lighting and widening of the road.

Many residents have continued to let me know their concerns about

this extremely busy intersection.

The upgrade was due to start in December last year.

When the project was delayed, I wrote to the Federal Minister. I'm pleased that it is now back on track.

Council traffic engineers have confirmed a construction timeline scheduled to start in March-April 2026, dependant on finalising contracts and weather conditions.

This project is a joint initiative between Logan City Council and the Australian Government's Black Spot Program.

Scan this QR code to find out more information about this intersection upgrade.

An upgrade is now underway for the busy Logan Reserve Road and School Road intersection.

Pedestrian crossing makes park access much safer

A new pedestrian crossing will be installed across Carvers Way in Park Ridge.

This new crossing will provide safe access for children and parents to access the local park from their homes. It will include line-raised traffic and refuge islands, line markings, signage and concrete pedestrian ramps for entry and exit of the footpath.

This was an issue that was raised at the Division 8 community meetings. We discussed the idea, took it to Council and now it is being delivered. These meetings are a great way to find out what is needed in our area and connect with locals.

Mayor's message

Did you hear the big news? Amazon Australia is coming to Logan.

A new \$750 million robotics fulfilment

centre will be built at North Maclean, creating more than 2,000 jobs during construction and fit-out, and around 1,000 ongoing jobs for people in our community once it's up and running.

Plans have been revealed for the four-level facility, which is set to cover about 150,000 square metres. That's almost twice the size of Suncorp Stadium.

When it's operating at full capacity, the centre will process more than 125 million packages a year and hold up to 15 million items ready to ship. With advanced AI and automation, that means faster delivery for customers right across Queensland.

The City of Logan is the perfect place for a company like Amazon to invest. We're the youngest and fastest growing city in Queensland, and many in our community want the opportunity to work closer to home.

Local jobs mean less traffic on our roads and more time with family.

I also love how Amazon's robotic warehouses combine technology and people. The technology handles the heavy lifting and repetitive tasks, while people focus on the work that requires skill, judgement and experience.

Your Councillors and I believe it's important that high-paying technology jobs are created right here in Logan. It's something many of you told me you wanted when I was running for Mayor.

Amazon joins big names like Toyota, Culture Kings, LSKD and Little Red Dumpling which have already invested in Logan's bright future. They know what we know. Logan is the place to be.

The Amazon fulfilment centre is expected to be completed in 2028.

Mayor Jon Raven

Immunising your child

Immunisation is a **safe** and **effective** way of protecting against harmful diseases.

The Logan City Council school immunisation program provides **free immunisations** to **year 7** and **year 10** students.
